Crossbill Guides - Upcoming guides and plans for future guidebooks

Version October 2011

The Crossbill Guides Foundation produces in-depth, 'educational' nature travel guidebooks of areas in Europe. Our potential work field comprises the West Palearctic, which is Europe up to the Ural mountains, Turkey, Africa north of the Sahara and the Atlantic Islands of the Azores and Canaries.

Within this region, we are currently working on the following guidebooks:

Spanish Pyrenees and steppes of Huesca	scheduled release	December 2011
Kempen en Maasland - Belgium (in Dutch)	scheduled release	March 2012
Iceland	scheduled release	late 2012

Other guidebooks in preparation

North Greece

North-east Poland - including Biebrza and Bialowieza

New ideas and opportunities may arise at any time, as may challenges to the projected schedule. Therefore, this 'agenda' is flexible and may change in the future. Updated lists of future guidebooks and their projected releases will be provided regularly.
